ADONIAS HAILE

Software Engineer | Fintech Integration | Java Spring Boot | Flutter

Addis Ababa, Ethiopia | +251 989 858 377 | adoniashaile1@gmail.com

LinkedIn | GitHub | Portfolio | resucv.com

PROFESSIONAL SUMMARY

Software engineer with hands-on banking and fintech experience building secure Java Spring Boot APIs and integration middleware (WSO2 Micro Integrator), payment-switch connectivity over ISO 8583, Ethiopian National ID (Fayda) and instant payment (IPS) integrations. Also ships production Flutter, Kotlin and Swift apps end to end, including Google Play and App Store release management for a live banking app. Comfortable with production debugging, Git, Docker and CI/CD, and with working alongside product owners, banks and external parties in agile teams.

TECHNICAL SKILLS

Backend & Integration	Java, Spring Boot, Spring MVC, Spring Security, REST APIs, WSO2 Micro Integrator, ISO 8583, Keycloak / JWT, microservices, hexagonal architecture, SOLID
Mobile	Flutter / Dart, Kotlin (Android), Swift (iOS), Firebase / FCM, WebSockets, Clean Architecture, state management
Fintech & Banking	Sopra Banking Software (DBS platform) SDK, instant payment system (IPS), Fayda national ID, bill payment, Chapa and Campay gateways
DevOps & Tools	Git / GitHub, Docker, CI/CD with GitHub Actions, Google Play Console, App Store Connect, Figma

WORK EXPERIENCE

Flutter Developer – Eaglelion Systems Technology

Aug 2026 – Present

- Deliver feature increments and bug fixes on the CBE Connect Flutter mobile app.
- Contribute to the Dashen Bank paperless Flutter project.

Software Engineer (Spring Boot | Kotlin | Swift) – Lion International Bank

May 2025 – Aug 2026

Full time, onsite. Built and supported the bank's APIs, integrations and the Anbesa Plus mobile banking app (Android and iOS) on the Sopra Banking Software / DBS platform.

Backend, APIs & Integration

- Developed REST APIs and integration services with Java Spring Boot and WSO2 Micro Integrator (MI) for the bank's digital channels and core systems.
- Built the bank's **Fayda (Ethiopian National ID)** integration.
- Built the bank's **IPS (instant payment system)** integration.
- Diagnosed and resolved a TCP socket / **ISO 8583** payment-switch connection issue in a Spring Boot client.
- Fixed bill-payment flow defects: incorrect field mappings, providerId mismatches and OTP confirmation failures.
- Debugged Keycloak / JWT authentication failures and documented API flows as structured technical reports.
- Implemented transaction receipt download across both v1 and v2 download endpoints, handling their different ID-parsing strategies.

Mobile Banking App (Kotlin & Swift) and Release Management

- Integrated and maintained the Sopra Banking Software / DBS banking SDK in the Android (Kotlin) and iOS (Swift) apps, including the SDK upgrades from hotfix.9 to hotfix.12.
- Resolved iOS TLS certificate-pinning failures caused by a renewed production MinIO server certificate.
- Ported transaction receipt logic from Kotlin to Swift and implemented a LibPhoneNumberParser for iOS.
- Implemented the Google Play In-App Update API and set up FCM push-notification campaign targeting across multiple package names.
- Owned release management on Google Play Console and App Store Connect for a live banking app: submissions, updates and compliance checks over more than a year.

Production Support

- Took part in daily debugging and issue resolution on core banking systems.

Full-Stack Developer (Spring Boot | Flutter) – resuCV (side project)

Live at resucv.com

- Built a resume and cover-letter platform end to end, now deployed at resucv.com.
- Developed the Java Spring Boot backend following hexagonal architecture.
- Built the web, Android and iOS apps from a single Flutter codebase.

Flutter Developer and Trainer – Qemer Software Technology (Contract)

Aug 2024 – Dec 2024

- Developed the Mood Ride user app (cloud services, backend API, Google APIs and WebSocket integration) and maintained the Swift Ride user and driver apps.
- Designed the Alibo Market app in Figma.

Flutter Developer – EthioClicks (Part-time, Remote) Aug 2022 – Dec 2024

- Developed the Swift Delivery mobile app integrated with the backend (cloud services, backend API and Google APIs) and designed the Akababi app in Figma.

Flutter Developer – Ewenet Communication (Freelance) Aug 2023 – Nov 2023

- Developed the Arat Killo mobile app integrated with the backend, working closely with the backend developer and reporting progress daily.

EDUCATION

B.Sc. Software Engineering, Bahir Dar University GPA 3.86 / 4.0
